I'm self learner. I have been working as software engineer more than 10+ years. I experienced at mobile and web development using modern javascript frameworks, focused on clean code, great DX, and business impact.

Work Experiences

Maphubs, inc - US (Remote Based)

Oct 2022 - Oct 2025

Full Stack Developer

- Developed a deforestation monitoring application with integrated map
- Developed grievance tracking related to deforestation for supply chain
- Created a web application using geospatial technology to monitor global natural resources
- Built a mobile application to display data from the existing web application
- Implemented features to visualize deforestation, grievances, mills, and plots on the map
- Developed functionality to display jurisdiction areas across Indonesia
- Built automation scripts to load and process large-scale data

Upwork

Feb 2024 - Present

Freelance Full Stack Developer

- Consultant / Instructor (React & Next.js) : Guided teams from zero to deployable apps; designed learning paths, reviewed architecture, and paired on code to accelerate delivery.
- Travel site (England focus) : Built a TripAdvisor-style platform with search, reviews, and map-based discovery using Next.js and modern React patterns.
- Buffalo Chip Global : Improved the marketing site by slicing the figma design, implementing new features, performance tweaks, and UI refinements; collaborated on release planning and QA.
- CloudCannon + Astro integration : Connected CloudCannon as the CMS to an Astro front end, enabling non-technical editors to manage content with automated builds and previews.
- MakeMuuvs.com (client) : Shipped mobile and web features using React Native (mobile) and Laravel + Inertia.js (web), aligning UX, API contracts, and release schedules.
- Built Neshwa, a social community mobile application (using React Native) where users ask/answer questions, post images, upvote/downvote, bookmark, and save posts.

MyBoost, co - Malaysia (Remote Based)

Nov 2021 - Nov 2022

Full Stack Developer

- Delivered a fully functional React web portal for a loan-lending platform, from architecture to launch.
- Built an enterprise loan application in React with robust form flows, validation, and role-based access.
- Developed a mobile-ready single-page app (embedded via iframe) for seamless in-app integration.
- Designed and implemented backend APIs using Spring boot to power the frontend (auth, loan workflows, reporting).
- Boosted performance across React and React Native features (render times, bundle size, network calls).
- Partnered with product/design to ship continuous improvements and new capabilities in Web & RN.
- Resolved critical bugs and shipped enhancements based on clear acceptance criteria and SLAs.
- Containerized and deployed services on GCP (Cloud Run/Storage/CI/CD), automating repeatable releases.
- Mentored and led junior developers to be onboarded faster with docs, pairing, and code reviews.

CEP-CCIT FTUI - Indonesia

Sep 2022 - Aug 2024

Temporary Lecturer

- Taught RDBMS (MySQL) to university students

- Taught System Analysis and Design to university students
- Taught Object-Oriented Programming to university students

PT Adi Consulting - Indonesia (Hybrid Based)

Mar 2021 - Sep 2021

Back End Developer

- IT Consultant (Contract) at Mandiri Bank to do support at core banking applications across development and maintenance cycles.
- Resolved high-priority defects in production/staging environments, improving stability and reducing support tickets
- Delivered new features for the enterprise desktop application, from requirements and design to implementation, testing, and release using Java spring boot.
- Collaborated with cross-functional teams (product, QA, operations) to ensure compliant, on-schedule releases.
- Wrote clear technical docs & handover notes to transfer knowledge and support.

Wirecard - Indonesia

Jan 2018 - Feb 2021

Full Stack Developer

- Back-end Engineer (Java) for an internal attendance/absence system which designed REST APIs, implemented business rules, and optimized queries for reliability and speed.
- Shipped new features for a mobile banking app (Android/iOS), covering secure auth, transaction flows, and notifications.
- Resolved production bugs and regressions in the mobile app with root-cause analysis, improving crash-free sessions and stability.
- Partnered with banking clients including Afir Bank, CIMB, Bank Mandiri, and Bankaltimtara, aligning releases with security/compliance standards to created mobile application using React Native.
- Improved CI/CD and test coverage to accelerate safe releases and reduce manual QA effort.

PT Xsis Mitra Utama - Indonesia

Aug 2015 - Aug 2017

- Outsourced engineering for EDC & POS systems serving banking/retail clients.
- Back-end development in Java (Spring Boot) for high-volume transaction processing.
- Built services for authorization, capture, refund/reversal, settlement, and reconciliation.

Education Level

President University

Aug 2010 - Jul 2014

Bachelor of Information Technology

Tech Stacks

Web Development

HTML, React, Next JS, Tailwind, Typescript, Vue, Laravel Inertia, Nuxt

Mobile Development

React Native, Flutter

Back End

Nest JS, Express, Node JS, Java Spring boot, Python, Golang

Databases

PostgreSQL, Sqlite, MySQL, DuckDB, Supabase

Others

Docker, Redis, Shopify, Solidity, Strapi, Hydrogen, Ghost, Stripe, CloudCannon (astro), Google Cloud Platform, AWS

Test Automation

Jest, Playwright

Skills, Achievements & Other Experience

- **Projects (Web App)** 🌐 (2024): Palmoil.io
- **Projects (Mobile App)** 🌐 (2026): Echo Flow
- **Soft Skills** 🌐 (2024): N5 Japanese Language Program
- **Soft Skill:** IELTS British Council Grade B2
- **Soft Skills** 🌐 (2025): English Proficiency Test Prediction of Toefl Test
- **Volunteer Act** (2026): Collaborate With JDC to introduce Indonesian Culture to Japan People
- **Soft Skills** 🌐 (2024): Get To Know Flutter 3.0
